CS352: Sprint 2 – Online Store Platform

Daily scrum meeting template

Contents

Day 1

What will be done today

All the team: Unify all the unit testing admins and users, understand docker as well as middleware proxy.

Ehap: Add proxy authentication middleware to the system

Hussien: Change database controller class to be an interface and add MySQLController class.

Khaled: Add delete user function.

Hatem: Check that emails must be unique when registering.

Current obstacles

Understanding docker as well as proxy security middleware. Ehap is facing a problem as he is windows 7 so he need to install docker toolbox instead of docker for windows.
